# Employee Monitoring Software

Employee Monitoring Software allows you to gain insights into workplace productivity and well being across the office, remote and hybrid employees. Activtrak is a platform that analyses digital working activity data to improve how your employees work, whether this be for personal development, company growth, decision making or to share insights with team managers - This software has you covered.

In addition to this, there are added benefits to reduce administrational duties - with reports that can log working hours of employees to assist with payroll or those employees working flexible hours.

Key Features

- Time Tracking
- Internet & App Monitoring
- Screenshots and Video Recording
- File and Document Tracking
- Communication Monitoring
- Reporting and Analytics

Dashboard: Allows you to see employee work habits and provide timely guidance.

Reports: Daily Breakdown of time spent on productive vs unproductive tasks, helping you understand working hours and unused time.

Apps & Website Usage: Which websites and applications are being used giving you visibility on activities and how these align with their current responsibilities. In addition, giving you knowledge on if the new applications need vetting to avoid compliance risks.

Integration - This software can integrate with numerous systems including Microsoft Teams, Zendesk, Outlook, and much more.

Workload Management: Allowing you to see alerts for employees reach signs of 'Burnout' giving you insight into helping employees balance their workload.

Location Insights: Determine whether employees are more productive when working in the office, remotely, or hybrid. Receive reports and ensure employees are utilising their time efficiently.

Productivity Coaching: Virtual productivity coach analyses your teams data and provides recommendations on how to help.

Data Privacy Controls - Prevents collection of any personal and sensitive user data.

ActivTrak Allows you to:

- Gain insights into work habits
- View business wide productivity trends, to assist with decision making
- Improve technology usage and optimise efficiency
- Plan employee development plans and growth
- Safeguard data and security for customers

This software is not about micro-managing individuals or teams, but about successfully creating an environment that is *fair, safe, and grows the business* through productivity.
